Notes: The totals presented for each island encompass arrivals at both the first and second ports of entry. In contrast, the total arrivals for the U.S. Virgin Islands (U.S.V.I.) are calculated solely based on the first territorial port of entry. Passengers who visit multiple U.S. Virgin Islands ports during the same cruise are counted only once in the U.S.V.I. total. Consequently, the total for the U.S.V.I. will consistently be less than or equal to the combined totals of the two individual islands. Please be advised that this data is subject to revision.
